Subject: RE:

We received a letter today from NR exempting us from the requirement today to perform public release of information (PRI) review of unclassified correspondence with the NRC. This will resolve the issue we have had lately with the release of unclassified documents. Please let me know if you have any questions.

We were told that a response would be to us by the end of last week. Our contracts folks are following up with NR today. I will let you know their reply. Is this issue currently holding up the release of any documents?

Peter the letter requesting NR approval for a "blanket exception" from their Public Release of Information contract clause for documents sent to the NRC will be submitted to NR this week. Do you need me to call you to discuss this issue further at this time?

Barry,
Could you have David Ward give me a call...from my staff it appears that the only item for release ability is the term NAVY.....I know that you have a contract issue to work out with DOE...but this issue needs to be resolved....

Amy,

The last page of the fax looked sloppy to me, so I am re-sending the last page of the fax.

Thanks,

Barry Cole
